Availability: immediate, full-time · **Languages:** Ukrainian (native), English (C1–C2) · **Location:** currently Budapest; seven years of distributed delivery with Ukrainian and US teams — open to discussing the hybrid format

PROFESSIONAL SUMMARY

Technical writer with seven years of documentation ownership for cloud and SaaS products, working directly with Product, Development, and Support teams on a fixed release cadence. At SimpliGov I was the sole documentation owner for a US government-workflow platform: API and developer references, release notes for every release cycle, a Confluence knowledge base, user guides, and video tutorials. At GlobalLogic I prepared and reviewed regulatory and licensing documentation for a medical-device client against FDA/CE standards — experience that maps directly onto the accuracy and traceability expectations of the pharmaceutical domain. Native Ukrainian and professional English, with hands-on multi-market localisation review, and a further twenty years as a journalist and editor spent making complicated subjects clear to non-specialist readers.

CORE COMPETENCIES FOR THIS ROLE

User Documentation	User and admin guides, module instructions, quickstart manuals, FAQs, online help, and knowledge-base articles for technical and non-technical audiences
Release Documentation	Owned release notes across every release cycle for three years; status-page communication; coordination with Product and Engineering to have documentation ready at release
API & Integration Docs	REST API references, developer documentation, integration guides, and configuration documentation for ERP and business systems
Process & Internal Docs	Internal knowledge bases on Confluence, onboarding material, technical reports, executive summaries, risk assessments, and mitigation procedures
Localisation	Multi-market documentation review with translated output checked against source material; Poedit and POEditor; native Ukrainian, professional English
Visual Documentation	Screenshots, diagrams, GIFs, and video tutorials produced end to end — backed by ten years of video and audio production
Standards & Governance	Style guides, terminology glossaries, article templates, and information architecture — built, documented, then applied as review criteria across a team's output
Agile Delivery	Reviewed BRDs, designs, and user stories during development; prepared change requests; ran manual testing and logged defects on the products I documented
Tools	Confluence, Jira, MkDocs, RoboHelp, Markdown, XML/DITA, Git and GitHub, Figma, Miro, Notion, Microsoft Office, Google Workspace
Domain Exposure	Regulated healthcare and medical devices (FDA/CE) · ERP and CRM-adjacent business systems · telecommunications · government workflow SaaS · industrial automation

RELEVANT EXPERIENCE

Senior Technical Writer — SimpliGov

Sacramento, CA, USA · Remote | July 2023 — May 2026

- **Release cycle ownership:** produced release notes for every release and maintained status-page updates, working from Product and Development material and confirming documentation was ready before each release went out.
- **API and developer documentation:** designed and maintained API references used by external developers integrating with the platform.
- **Knowledge base:** architected and maintained the internal Confluence documentation set, which shortened onboarding and kept engineering teams aligned.
- **User enablement:** wrote user guides and produced video tutorials aimed at reducing support tickets and increasing self-service.
- Sole documentation owner for the product — reviewed and corrected engineering-authored material for accuracy, clarity, and completeness before publication, working independently across a nine-hour time-zone difference.

Senior Technical Writer — GlobalLogic

Kyiv, Ukraine | Nov 2021 — June 2023

- **NuvoAir (medical devices):** prepared and reviewed regulatory and licensing documentation against FDA/CE standards — work in which a missed inconsistency has consequences and every claim must be traceable to evidence.
- **Verizon (telecommunications):** reviewed and maintained interface documentation for iOS and Android applications; built and delivered technical presentations for enterprise audiences.
- **3M (industrial materials):** translated complex backend architecture into accurate technical guides for developer audiences.
- Wrote developer and user documentation in MkDocs, GitHub, and VS Code; prepared change requests, risk assessments, and user stories; ran manual testing and documented results.

Technical Writer — BJet and ASBIS Ukraine

Ukraine | Sep 2020 — Nov 2021

- **ERP documentation:** authored configuration guides and user documentation for Odoo ERP systems and dashboards — business-application documentation closest in shape to CRM work.
- **Localisation:** managed documentation review across multiple language markets, checking translated output for accuracy and consistency against the source, using Poedit and POEditor.
- Produced user guides, quickstart manuals, online help, legal and policy documents, and video tutorials; worked in RoboHelp and Confluence.

Technical Writer / Project Manager — EGIS Ukraine

Kyiv Region, Ukraine | Dec 2018 — Sep 2020

- Reviewed engineering documentation and technical reports for infrastructure projects; produced executive summaries and mitigation strategies condensing long technical material for decision-makers.

Journalist, Editor, and Project Manager — Ukrainian Helsinki Human Rights Union ·
Hromadske Radio · Telekrytyka, Vechirni Visti, Delo

Ukraine | 2008 — 2018

- A decade of professional fact-checking, source verification, and editorial judgement, publishing to deadline in Ukrainian and English; over 600 articles and 200+ radio programmes.
- Edited and reviewed other writers' work, and managed web content, media outreach, and video projects.

Automation and Instrumentation Engineer — District Heating Networks

Zaporizhzhia, Ukraine | 2001 — 2007

- Managed industrial automation systems, metrology processes, and the unit's technical documentation — measurement, calibration, and verification against defined tolerances.

EDUCATION

PhD in Philosophy and Literature (in progress)
University of Pécs

Hungary | 2023 — 2028

Bachelor of Arts, English Translation / ESL
Classic Private University

Ukraine | 2006 — 2008

Master's & Bachelor's in Engineering (Automation and Instrumentation)

Zaporizhzhia State Engineering Academy

Ukraine | 1994 — 1999

Certificate of Excellence, Digital Journalism
Intajour (International Academy of Journalism)

Hamburg, Germany | 2011 — 2012

LANGUAGES

Ukrainian — Native | English — Professional (C1–C2), working language for 15+ years, BA in English translation | Hungarian, German, French — Basic

ADDITIONAL

Author of six books, including the novel *Kaharlyk*, published in English translation by Kalyna Language Press, UK, 2016 (ISBN 978-0993197253); member of the National Union of Writers of Ukraine. Doctoral research on science fiction, AI ethics, and machine cognition, with conference papers presented internationally. Daily working use of Claude, ChatGPT, Gemini, and GitHub Copilot for drafting and review.
